Life Sciences

CORNING

Corning is one of the world's leading innovators in materials science. Headquartered in New York, Corning Inc. has been offering specialized services in the areas of advanced optics, display technologies, environmental technologies, life sciences, optical communications, pharmaceutical technologies. Operational since 1851, the company's Corning® Gorilla® Glass is aided by its research & development in the field of emerging innovations.

Business Challenges

- Increase forecast accuracy by centralizing the global demand planning process onto a single cloud platform
- Balance the art and science of achieving required customer service levels & stocking the inventory at right nodes
- Unify demand/inventory planning processes through a common data model
- Control working capital through an inventory management system that accounted for deduction in excess/obsolete inventory

The Resolution

- Leveraged IBP S&OP, demand planning and Inventory modules to create a centralized demand and inventory planning process
- Templates/dashboards with KPI analytics depicting health of demand, inventory processes & alerts for exception management
- Multi-Stage inventory optimization that considers various uncertainties involved in supply chain planning like forecasting, transportation, production and proposes recommendations based on customer's target service levels reducing overall inventory cost
- What-if scenarios to quantify the effect of every decision through out the demand/inventory planning process

Intrigo Advantage and Key Benefits

- Increased forecast accuracy with consolidated global demand planning process
- Enabled better control over working capital through an inventory management system that accounted for deduction in excess/obsolete inventory
- Enabled continuity with existing processes on prior tools while tapping into the power of the new platform.
- Fast time-to-value with agile implementation that delivered incremental value in rapid iterations

About Intrigo

We empower enterprises for the future.

Intrigo Systems, Inc. is a part of Accenture and an SAP Channel Partner. It is a leading provider of advisory, implementation, and support services. We provide business applications focused on orchestrating customer value networks in the changing SAP Enterprise technology landscape. Intrigo has also helped SAP design Advance Planning & Optimization (APO) and implemented some of the largest successful environments.
