## Procurement and Supply Planning with SAP IBP

Dole Packaged Foods, California is an agricultural corporation and the largest producer and marketer of high-quality fresh fruits and vegetables and packaged and frozen food products. Founded in 1851, Dole has over 300 products in 90 countries.

### Business Challenges

- Enable user friendly and systematic model to plan production of finished goods which will drive requirements for raw materials (fruits and packaging)
- Use of an integrated system that will have automated integration of planning data, inbound and outbound, with minimal manual data input
- To simulate multiple procurement scenarios to generate commodity buy plan for fruits, also taking into account the crop years for each commodity
- To enable inventory visibility and capacity balancing of production lines

### The Resolution

- Procurement Planning – Manage requirements for commodities which are driven by demand on finished goods and plan procurement from different suppliers around the world. The process also has visibility into inventory and open purchase orders.
- Supply Planning – Generate a supply plan with visibility into inventory, open orders and receipts. The system also considers inventory targets and production lot sizes. Evaluate the utilization of resources and balance capacity to come up with a feasible plan. The plan is sent to ECC for MRP run.

### Intrigo Advantage and Key Benefits

- Simultaneously designed, developed, and delivered two projects – Procurement planning and Supply Planning
- All planning information in one system enabling planners to have complete traceability across supply chain
- Supply Visibility – All available inventory and open orders are considered in the plan to provide a realistic finished goods production
- Dependent Requirements – Ability to generate commodity and packaging material requirements using multi-level bill-of-material explosion
- Leveraged different capabilities in SAP IBP like Scenarios, Simulations, Analytics, Dashboards, Custom Alerts, etc., with easy to use MS Excel front end functionalities
- In-depth technical training of IBP and CPI for the client to maintain the model moving forward

## About Intrigo

We empower enterprises for the future.

Intrigo Systems, Inc. is a part of Accenture and an SAP Channel Partner. It is a leading provider of advisory, implementation, and support services. We provide business applications focused on orchestrating customer value networks in the changing SAP Enterprise technology landscape. Intrigo has also helped SAP design Advance Planning & Optimization (APO) and implemented some of the largest successful environments.
